

Peer Groups Exclusively for Family Businesses

The Power of Collective Wisdom and Moral Support

Our specialized peer groups connect people in a supportive, confidential environment to learn from each other's experiences on family business issues. Led by a family business advisor, peer groups provide an outlet for sharing personal, professional and family matters.

For optimal growth and development, each group will focus on one niche within the family business umbrella (women in leadership, non-family executives, etc.). Applicants are carefully vetted to best place members in a group of their peers.
